

Λ - PRO-HYGIEN

The Painted Metal Atelier

A-PRO-HYGIEN

The application of our many years of know-how in the world of pre-painted metals allows us to best satisfy the creative needs of **architecture** and **design** projects.

A-Pro-Hygien is our **Premium Collection** product that gives metal some particular **antimicrobial properties**.

As a result, this product is widely used in public spaces subject to **heavy density of people**, and in particular kindergartens, schools, offices, shopping centres, and recreational areas.

Today's market is ever more **sensitive** to the issues of **sanitizing** public spaces, and standard ISO 22196:2007 defines parameters for the antibacterial action of plastic products treated with disinfectants.

Thanks to a special treatment, **A-Pro-Hygien** makes it possible to add **antibacterial properties** to metal and improve its sanitary/health performance.

- > **Support:**
aluminium, steel
- > **Colours available:**
white and transparent
- > **Guarantee:**
up to 10 years
- > **Applications:**
indoor

A-PRO-HYGIEN

A-Pro-Hygien is created in a production process involving application of **coatings** that give the material specific **antimicrobial properties**.

The paint components inhibit proliferation of colonies of the most common types of bacteria and contribute towards their elimination.

This makes the product suitable for **application on walls and ceilings in locations with a high density** of people, like for example kindergartens, schools, public offices, shopping centres, and recreational areas where specific **sanitation** treatments are not conducted frequently.

Tests pursuant to standard ISO 22196:2007, conducted at specialized laboratories, have demonstrated an **effective action over 24 hours**, reducing more than **99.99 %** of the colonies of the bacteria *Staphylococcus aureus*, *Escherichia coli* 01257, *Legionella pneumophila*, *Salmonella enterica*, *Pseudomonas aeruginosa*, *Enterobacter aerogenes*, and *Enterococcus faecalis*.

This product is available in two versions. white and transparent: the latter can be applied on any polyester base, providing antimicrobial properties for pre-painted materials of any colour.

The paint varieties are only suitable for use in **indoor** environments.

Feasibility

Coil width	min. 500 mm · max. 1,320 mm
Coil thickness	min. 0.3 mm · max. 1.5 mm
External coil diameter	min. 700 mm · max. 1,300 mm
Internal coil diameter	508 mm; 610 mm
Strip width	min. 20 mm

TREATMENT

2 degreasings + chrome-free passivation

TOP SURFACE

PRIMER: 5 - 7 microns
TOP WHITE PRO-HYGIEN:
 15 - 20 microns
 or
 PRIMER: 5 - 7 microns (only for steel)
 BASE: PE 10-15 microns
TOP TRANSPARENT PRO-HYGIEN: 12 microns

BACK SURFACE

BACK COAT: 4 - 6 microns

Coating used: compliant with RoHS Directive

Technical Features

TEST	VALUE	REFERENCE STANDARD
Thickness	20 - 27	EN 13523-1 (ECCA T1)
